# BUSINESS ACTIVITY EXPECTED TO LIFT IN 2014 <br> Borrowing and investment plans strengthen 

Two out of three Australian businesses ( 68 per cent) are more optimistic about growth this year compared to 2013, with the positive mood lifting first quarter expectations for sales, profits, selling prices, investment and employment to their highest levels in 12 months.

With greater activity expected, Dun \& Bradstreet's Business Expectations Survey reveals that 18 per cent of businesses are planning to access new finance during Q1 to grow their operations; the survey's highest response since Q4 2011.

The pick-up in borrowing plans is reflected in stronger capital investment and employment intentions, which have recovered from negative territory during the previous quarter and moved above their respective 10-year averages.

Thirteen per cent of businesses plan to increase capital spending in Q1 2014, compared to the five per cent which will decrease, lifting the investment index from -0.4 points last quarterto 7.2 points.

Meanwhile, hiring plans have also strengthened, with 15 per cent of businesses intending to take on more staff while seven per cent plan to reduce their employment levels. The response has taken D\&B's employment index to a three-year high of 8.8 points.

Business expectations: Q1 2014

In addition to a turnaround in business spending intentions, D\&B's sales index has jumped to 27.5 points, its highest point in 12 months, while the profits index has reached 25 points, its highest level since the first quarter of 2011.

## MEDIA RELEASE

With strengthening business conditions, 24 per cent of businesses are planning to raise the prices of their products and services during the first quarter of the year. While supporting healthier profit margins, the increase presents a potential inflation concern to economy.
"These latest findings further support the picture of an economy that has found its feet following a 2013 of weak and irregular business conditions," said Danielle Woods, Director of Corporate Affairs at Dun \& Bradstreet.
"With companies looking ahead with optimism, forecasting strong sales and profits, and most recently showing a willingness and capacity to borrow money to grow their operations, the signs are positive for the New Year," she said.
"In particular, the increases in hiring and capital investment intentions indicate that businesses are preparing for a year of stronger growth and business activity," Ms Woods added.

Corresponding to the more positive outlook, D\&B's Business Expectations Survey has found that fewer companies see obstacles togrowth in 2014. When asked to identify the biggest barrier to growth in the year ahead, the most common response ( 35 per cent) was 'no major barrier'.

Barriers to growth in 2014

"The new year is starting with business expectations at very optimistic levels," said Stephen Koukoulas, Economic Adviser to Dun \& Bradstreet.
"Both sales and profit expectations continue to lift, signalling stronger economic growth in the early months of 2014.
"The employment outlook has also improved markedly, suggesting that the unemployment rate may soon start to fall as job creation picks up.
"If there is one cloud on the horizon, it is the expected lift in selling prices. A stronger economy is no doubt allowing firms to move their prices higher, but we are also seeing the impact on inflation from the recent weakness of the Australian dollar.
"This is likely to cause the Reserve Bank some concern, and is a fundamental factor why we are likely to see a series of interest rate rises during 2014," he added.

## The latest D\&B National Business Expectations Survey shows:

## Outlook for the Marchquarter 2014

- The employment expectations index has increased to above zero for the first time since Q2 2013, reaching 8.8 points.
- The sales index has risen strongly to 27.5 points, up from 7.9 points in the previous quarter.
- Profit expectations for the quarter ahead have lifted, with the index increasing from 21.1points in the previous quarter to 25.0 points.
- Plans for capital investment have increased into positive territory, lifting to 7.2 points from -0.4 points in the previous quarter.
- The selling prices index hasrisen for athird consecutive quarter, up to 19.5 points from 10.2 pointsin the quarter previous.

## Issues expected to influence operations in the Marchquarter 2014

- 68 per cent of businesses are more optimistic about growth in 2014 compared to 2013, while26per cent are less optimistic.Six per cent are undecided.
- Cash flow is identified as the issue most likely to impact business operations in the next quarter ( 32 per cent), followed by the level of the dollar ( 17 per cent) and interest rates ( 12 per cent).
- 38 per cent of businesses have had customers or suppliers that became insolvent, or were otherwise unable to pay them, during 2013.
- 37 per cent of companies view the Christmas trading period as significant for their business, compared to 62 per cent which do not. One per cent is undecided.
- 39 per cent of businesses expect no impact from the level of the Australian dollar, while 21 per cent expect a positive impact and 32 per cent a negative impact. Eight per cent are undecided.
- 18per cent of businesses intend to seek finance or new credit in the quarter ahead to help their business grow, while 81per cent will not. One per cent is undecided.

## Actual results for the September quarter 2013

- Actual employment levels increased from -8.3points in the previous quarter to 1.8 points, the first time the index has moved out of negative territory for five consecutive quarters.
- Sales activity improved, with the index rising to 7.5 points from -8.3 points in the previous quarter.
- Profits easedinQ3to 9.9 points, down from 11.6 points in the previous quarter.
- Capital investment activity stabilised, lifting from -4.2 points to 5.3 points quarter-on-quarter.
- Selling prices increased stronglyin the June quarter, rising from 6.1 points to 15.3 points.

## About the Survey

Each month business owners and senior executives representing the manufacturing; wholesale; retail; construction; transport, communications and utilities; finance, insurance and real estate; and services sectors across Australia are asked if they expect increases, decreases or no changes in their upcoming quarterly sales, profits, employment, capital investment and selling prices. Since its introduction in Australia in 1988, the survey has proven to be a highly reliable measure of economic performance.

The index figures used in the survey represent the net percentage of survey respondents expecting higher sales, profits, etc., compared with the same quarter of the previous year. The indices are calculated by subtracting the percentage of respondents expecting decreases from the percentage expecting increases.

## Methodology

Each month D\&B asks a sample of executives if they expect an increase, decrease or no change in their quarterahead sales, profits, employees, capital investment and selling prices compared with the same quarter a year ago.

The executives are also asked for actual changes over the twelve months to the latest completed quarter.

The Australian survey began in March 1988 obtaining some 900 responses in the third month of each quarter. Since the middle of 1999, the survey has been conducted monthly, initially with about 300 responses each month. From September 2000, responses have been obtained from 400 executives each month.

From July 2005, to simplify the interpretation of the survey data, the results have been presented as a sequence of preliminary, interim and final indexes. The 400 responses from the first month of each quarter give preliminary estimates of the quarter-ahead expectations and the quarter behind actual indexes. The 400 responses from the second month of the quarter are combined with those from the first month as interim estimates of the indexes based on 800 responses. The 400 responses from the third month are combined with those from the first two months to give the final expectations and actual indexes based on all 1,200 responses obtained during each quarter.

In this issue, the initialindexes for the latest quarters are based on the 1,200 responses obtained during October, November and December2013.

## Charts andtables

It is common practice to present the results of business expectations surveys as indexes showing the net balance of the positive and negative responses. However, this method of aggregating responses loses relevant information about the relative proportions and rates of change of the two (positive and negative) groups.

Accordingly, the detailed charts at the top of pages five to nine in the D\&BNational Business Expectations Survey show separately the positive and negative components of each of the various indexes. These charts help provide a better insight into the expectations and performance of Australian business than that shown by movements in the simple aggregation of the positive and negative responses.

The aggregate net balance indexes are shown in the charts at the bottom of pages 6 to 10 .

## About Dun \&Bradstreet

Established in 1887, Dun \& Bradstreet is Australia and New Zealand's oldest credit information bureau. Backed by its extensive financial database, D\&B helps businesses to make informed credit decisions, and consumers to access personal credit information.

D\&B works across the entire credit lifecycle to deliver data-driven solutions in sales and marketing, credit reporting and debt management.

Through analysis of financial and behavioural information, D\&B also provides current and predictive assessments of the economy, business conditions and credit activity.
